

## Boost Your Bottom Line. Manage Machine Performance.

Cloud based analytic software to manage your industrial machine performance

### BENEFITS

-  Industrial machines represent a significant capital investment.
-  The benefits of better performance are measured in tens of thousands if not millions of dollars per year. However, you can not fix what you do not measure.
-  Manage your machine performance and boost your bottom line.

### FEATURES

-  Root cause analysis of downtime, faults, and more
-  Historical trending of machine performance
-  Proactive Alerts and Exception Reporting
-  Financial calculator to Determine Bottom Line Impact

### IMPLEMENTATION

Getting started is easy and quick. Simply utilize our three step process.

1. Connect your industrial devices to our application through EWON devices and the Talk2M network.

2. Configure each of your industrial machines in the AI application through a drag and drop process.

3. Turn it on and watch your performance. Make changes and monitor your progress. Drive performance.

### BOOST THE BOTTOM LINE

Did you know that boosting OEE by even a percent can be worth thousands of dollars per day? Find out your OEE in minutes and identify how it is affecting your Bottom Line.

Eliminate the cost of poor machine performance using Automation Intellect's real insights.

**Monitor, Identify, Fix and Save.**

### MANAGE MACHINE PERFORMANCE

Automation Intellect is an unrivaled platform to monitor and improve the performance of your automated equipment.

Achieve world-class OEE with clear visibility & analytics of your machine's availability, performance, and quality.

Visit us at [www.automationintellect.com](http://www.automationintellect.com) for more information and to schedule a demo.

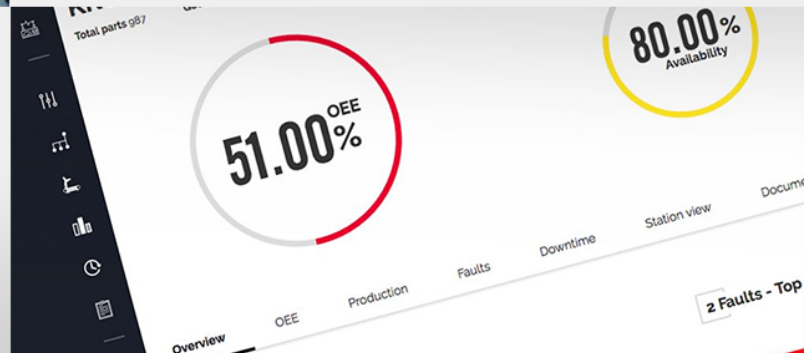

## SERVICES

Automation Intellect provides you with information that will allow you to improve your machine performance. If you need additional support getting up and running, or using the data to improve your machine performance, **we are here to help!**

### We can help with the following:

- Machine Performance Optimization guidance
- Integration of AI to your equipment
- Daily / Weekly insights for your machines
- Personalized alerts

We can help you improve the operation of your machines, by fixing issues that cause rejects, downtime, and general lack of performance. Contact us today.

### GET STARTED TODAY

-  Up and running in a day
-  Only pay for what you monitor
-  No additional hardware costs
-  Multi-layered security
-  Optimize Existing Equipment Usage
-  Visibility to leaking performance
-  Reduce / Prevent downtime
-  Maintain Optimum OEE performance
-  Make Decisions Based On Analytics
